Quality Policy

JIF Lighting is a company dedicated to the development and sale of public lighting equipment and related accessories.

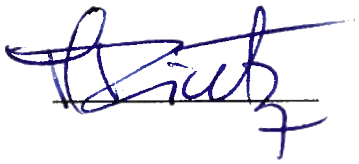

Our goal is to continuously pursue sound resource management, in order to boost competitiveness and ensure the sustainable development of our company.

We value the specialisation and know-how of our employees, always striving to have a motivated team with a clear vision of JIF Lighting's objectives.

We are committed to carrying out our business in a way that meets our customers' expectations, building a solid relationship through the delivery of high quality services, guided by professionalism.

To this end, we focus our work on the following pillars: **employee training, strategic partnerships, customer focus** and, as a result, the **quality** of the service provided.

Our involvement and commitment to achieving the objectives we have set is essential to the success of the company and to the satisfaction of all its customers, suppliers and partners. For this reason, we are committed to continually improving the effectiveness of the quality management system, in compliance with the requirements of NP EN ISO 9001:2015 and with all national legislation and relevant requirements applicable to our activity.
